Horse Health Checklist

Horse: _____

Even though we at ERC have a great record of preventing transmissible diseases from entering the client horse barns, we do acknowledge that the possibility of exposure remains whenever animals are constantly entering and leaving our facility. In order to protect all client horses from such an occurrence, we strongly recommend making sure that your horse is fully vaccinated for the following diseases: Eastern/Western Encephalitis, Influenza, Tetanus, Rhinopneumonitis, Rabies, Potomac Horse Fever, and West Nile Virus.

Is your horse showing any signs of illness at this time?

Yes ___ No ___ Date: _____

If yes, please give details: _____

All horses on the premises of ERC are required to have a current Coggins (EIA) test (within the last 12 months.) If verification of Coggins cannot be presented when the horse arrives, then a Coggins test will be done while the horse is at ERC.

Copy of Coggins attached: _____

Draw Coggins: _____

Routine Veterinary Services:

While your horse is stabled at ERC, we can make sure the additional services are provided, if desired:

1. Uterine Culture/Cytology Yes ___ No ___

2. Vaccinations	Recommendation	Services you want done?
